Dear Dr. Von Braun:

I would like to express my appreciation and that of the other members of the Directorate who were privileged to hear you speak at our dinner meeting on 21 December. The films of the Gemini VI and VII rendezvous maneuvers and your description of the Apollo program are a vivid reminder to all of us of the progress in our space program. Your presentation had special meaning to our group who are aware of the very great contribution which you have made to the success of our nation's space programs.

Thank you again for taking the time from your very busy schedule to meet with us. We wish you happiness and continued success during the forthcoming years.

Sincerely,

Albert D. Wheelon
